

## Pulsed Lavage

Our single-use high pressure Mölnlycke® Pulsed Lavage system effectively cleans bone and removes debris during total joint procedures, increasing cement penetration into the cancellous bone for potentially stronger implant fixation and reduced revision rates. It is also an effective mechanical debridement for cleaning wounds, removing dirt, necrotic tissue and debris.

### Available in two versions

- **AC adapter:** an environmentally-friendly version that eliminates the need for alkaline batteries. Single-use handpiece and re-usable AC adapter.
- **Built-in battery:** a flexible and mobile version with battery pack integrated into the handpiece, for quick and easy battery removal.

### All included means no hidden costs

- Ergonomic and comfortable handpiece
- Short fan spray tip with splash shield
- Long femoral canal tip
- Integrated suction and irrigation
- Cleaning rod for solving potential occlusion in the femoral tip

### Single packed or included in Mölnlycke® trays

- Include Pulsed Lavage in your customised procedure-specific tray for efficiency gains
- Also available as a sterile single packed option

AC Power\*

Built-in Battery

## Order information
