

## BARRIER® Extra Comfort Long-Sleeved Jackets

A difference you can feel

The AORN guidelines for surgical attire recommends that all non-scrubbed personnel wear a freshly laundered or single use long-sleeved jacket snapped closed with cuffs down to the wrists<sup>1</sup>. BARRIER single-use long-sleeved jackets are made from a unique, non-woven, spunbond material called Unisoft®. This spunbonding process significantly reduces the fabric's pore size which helps to minimize the risk of transmission of bacteria, while keeping breathability high.

- Unique Unisoft material offers extra comfort and softness
- Lightweight yet durable
- Meets AORN guidelines for surgical attire
- Large, ergonomically designed pockets
- Large size range from S to 3XL
- Also available in long for extra protection

## BARRIER® Long-Sleeved Jackets

Soft knit, white cuffs

Soft knit, white collar  
button closure

Two large front/side pockets
