

Committed to Customers – Today and Tomorrow

Supply and logistics challenges precipitated by the pandemic continue to plague the worldwide supply chain in many ways including large-scale shipping disruptions, container constraints and extended transit times that have multiplied in frequency and duration.

Accelerating Supply to our Customers

Our priority as always, is to service our loyal and committed customers and do our utmost to ensure reliable supply despite the impacts of worldwide market demand and transportation challenges.

Mölnlycke invested significant resources to increase our ability to meet customer product requirements, including:

- Increased production and packaging capacity
- Increased shipping frequency from plants to distribution facilities
- Expanded logistics partners to expand shipping capacity
- Alteration of shipping routes to avoid congested ports

Building for the Future

In September 2022, Mölnlycke will open its newest Biogel surgical glove factory, which will increase our production capacity by 50 percent. The company has invested close to 50 million euros for land, construction and equipment in Malaysia, the world's center of excellence for glove production.

This expansion will enable Mölnlycke to welcome new customers, support the growth in surgical procedures and explore future partnerships.

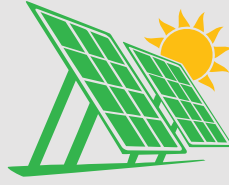

Biogel®

Mölnlycke®

GREEN FOR GROWTH

Our new factory will help lower our total climate impact without compromising product quality.

Glove production is one of our most resource-intensive production lines and the new plant will:

Generate green electricity with solar panels

Recycle 50% of the process water

Use state-of-the-art wastewater management

Zero manufacturing waste goes to landfill

Mölnlycke is deeply committed to have a positive long-term impact on everything we do – from our industry-leading solutions for customers to the communities in which we operate. We're careful of how resources are used and aim to reduce emissions and waste wherever possible to protect the environment. Mölnlycke has held environmental certification ISO 14001 since 2002.

Mölnlycke delivers more than just product excellence – we also provide:

- An opportunity to standardize to Biogel as your one surgical glove manufacturer and increase efficiency through a streamlined selection of gloves
- A team of Biogel glove experts including clinical nurses that can work with your facility's goals including standardization and reduced utilization.
- Guidance and insight including robust clinical education and economic advice to help you make the best product decisions and optimize their use across clinicians.
- Partnership that extends beyond clinical and economic support. We provide high-touch customer support to ensure implementation success.

To see how you can benefit from Biogel gloves, please reach out to your local **Biogel sales representative** or contact **Customer Care at 800-843-8497**.
